PROJECT OVERVIEW REPORT

1. Center Identifying Number
   AITF-RU4474

2. Project Title
   Feasibility and Design of an Accelerated Infrastructure Testing Facility (AITF)

3. Internal Principal Investigator
   Dr. Ali Maher
   Center for Advanced Infrastructure and Transportation (CAIT)
   Rutgers University
   100 Brett Rd. Piscataway, NJ 08854-8058

4. External Principal
   Malcolm G. McLaren, P.E., SECB
   McLaren Engineering Group
   100 Snake Hill Rd. West Nyack, NY 10994

5. Project Description
   To develop a bridge deck testing facility with plans for an initial phase to be constructed by 2010. This first phase would include an enclosed facility to house the testing equipment and samples. It will require loading docks, bridge cranes and other equipment necessary to perform and monitor the testing. A second building will be constructed on the site in this phase as a shell for a future materials testing lab. A third area will comprise an outdoor testing facility for pavement, and this will be constructed in a second phase.

6. Dates and Budget
   Start date: 2/26/2009
   End date: 4/15/2009
   Total Dollars: $38,000

7. Keywords
   Infrastructure, accelerated, bridge, testing facility
