

Dr. James Houle, University of New Hampshire

Dr. Houle is the Program Director for the Stormwater Center at University of New Hampshire. His responsibilities include directing and managing the Stormwater Center's growing body of research projects. Areas of expertise include diffusion of stormwater management solutions, such as green infrastructure, and low impact development strategies, planning and implementation, operation and maintenance, and water resource monitoring. Dr. Houle holds a Ph.D in Natural Resources and Environmental Science and has over fifteen years of experience with water quality related issues in New England and is a certified professional in stormwater quality and a certified professional in erosion and sediment control.
