

Byron Nicholas
Supervising Transportation Planner
Hudson County Office of Engineering

Byron Nicholas is a Supervising Transportation Planner in the Hudson County Office of Engineering. Byron holds a Professional Planners License for the State of New Jersey (PP) and is a member of the American Institute of Certified Planners (AICP) with over 9+ years of urban planning experience. In his role as supervising transportation planner for Hudson County, NJ, Byron works to allocate, develop and/or manage multi-million dollar program of multimodal federal and state funded transportation projects and studies with a focus on equitable practices and strategies. He also serves as the vice-chair of his regional MPO's Transportation Advisory Committee.

Prior to this role, Byron worked in the Geometric Design unit of New York City Department of Transportation. Byron is also the Founder of Grid City Planning, LLC. d/b/a Black + Urban, an online publication created as a safe space for African American and underrepresented urban planners, designers and forward thinkers. Byron has received both his Master's degree in Urban Planning ('13) and Bachelor's degree in Environmental Design ('11) from the University at Buffalo.
