

Elkins Green
Director, Environmental Resources,
New Jersey Department of Transportation

Elkins Green is a 40 plus year NJDOT employee, who has served for the last 16 years as a member of the Department's Senior Executive Service as Director of the Division of Environmental Resources, where his Division ensures that the Department's actions and activities comply with applicable federal and state requirements, and is the central point of contact for environmental policy. Elkins also currently serves as the Department's representative on the Interagency Council for Climate Change Resilience and the Environmental Justice Interagency Council. Elkins holds a Bachelors of Arts Degree and Master Degree in Urban Planning from Rutgers University, and is a Certified Public Manager. A true team player Elkins values the importance of team work and building lasting relationships with his coworkers, as well as striving to make a positive difference in the functions of the Department.
