

Kurt McCoy Bio

Kurt McCoy is a Supervising Engineer, Construction and Maintenance for the Division of Operations Support at the New Jersey Department of Transportation. His primary duties include being the Project Manager of 10-20 active design and construction resurfacing projects. Projects are limited scope that can be designed typically within one year. The resurfacing program typically completes \$85-95 million in resurfacing contracts per year. Other duties include completion of Maintenance Work Orders that can focus on single intersection or striping upgrades.

Education:

Bachelor's of Science in Civil and Environmental Engineering, Bucknell University, 2003

Master's of Engineering Management, Rowan University, 2017
